How to install the project step-by-step:

- 1. Download the project files from the Marketplace platform.
- 2. Extract the downloaded zip file to the root directory of your server and hosting.
- 3. Excess the installation page by navigating to <u>https://example.com/install</u> in your web browser.
- 4. The installation page will check for the system requirement. Ensure that your server meets all the necessary requirement and address any missing dependencies.

La Requirements	Welcome to installer wiz	aru
