Connect WhatsApp cloud Api to WhatsCloud Platform.

1. Sign up or log in to the WhatsCloud Platform and navigate to the My CloudApis Section.

- 2. Click on the Create CloudApi button to initiate the creation process.
- Fill in the required details, including your WhatsApp number (which is already connected to the WhatsApp Cloud API), a WhatsApp username (can be any desired username), WA Phone number ID, WA Business ID, Meta App ID, and WA Access Token. Then, click on the "Create Now" button.

- Click on the "Edit" button and enter the webhook URL and Verify Token obtained from the WhatsCloud platform after creating the CloudApi.
- 8. Once the verification is successfully completed, go to the "**Manage**" option in your WhatsApp Business account and subscribe to the "**Message**" event at the minimum.
- 9. After completing the verification process, return to the WhatsCloud Platform. You will receive a confirmation message indicating that **the CloudApi has been connected successfully**.
